1115 AM 1:00 This session will provide students with inagatar into how the Design Event works, what it takes to perform well, and how to use it to drive the team to perform better in many segments of the competition. 1215 PM 1:00 Natworking Lunch 1:15 PM 0:03 This presentation Overview 1:15 PM 0:03 This presentation will provide you are understanding of the Bustiness Presentation format for 2005, including changes to the event process and deadlines for card round of judging. 1:15 PM 0:13 Networking Break 1:15 PM 0:13 Networking Break 1:15 PM 0:15 Networking Break 1:15 PM 0:15 Networking Break 2:20 PM 1:00 This presentation to Commission of the Bustiness Presentation format for 2005, including changes to the event process and deadlines for card round of judging. 1:15 PM 0:15 Networking Break 2:20 PM 1:00 This presentation to Commission the Bustiness Presentation format for 2005, including changes to the event process and deadlines for card round of judging. 1:15 PM 0:15 Networking Break 2:20 PM 1:00 This presentation to Commission the Bustiness Presentation format for 2005, including changes to the event process and deadlines for card round of judging. 1:15 PM 0:15 Networking Break 2:20 PM 1:00 This presentation to Commission the Bustiness Presentation format for 2005, including changes to the event process and Adam Zernke, Launch Michigan Architecture Augustiness This presentation will cover the basic concepts and strategies of accumulator thermal Imanagement and walk through the development of a thermal model. 2:20 PM 1:00 This presentation will cover the basic concepts and strategies of accumulator thermal Imanagement and walk through the development of a thermal model. 2:20 PM 1:00 This presentation will focus on the principles of designing a suspension system and its relationship to three and vehicle performance. 2:20 PM 1:00 This presentation will focus on the principles of designing a suspension system and its relationship to three and vehicle performance. 2:20 PM 1:00 This presentation w	Auditorium (A200)
Business Presentation Overview This presentation will provide you an understanding of the Bustiness Presentation format for 2025, including changes to the event process and deadines for each round of judging. 1.45 PM 0.15 Networking Break Architecture A. 1.200 PM 1.00 Networking Break Architecture A. 1.00 Networking Break Architecture A. 1.00 Networking Break Architecture A. 1.00 PM 1.00 Networking Break Architecture A. 1.00 Net	Auditorium (A200)
1:15 PM 0:30 This presentation will provide you an understanding of the Bustiness Presentation format for 2025, including changes to the event process and deadlines for each round of judging. 1:45 PM 0:15 Networking Break Architecture Auditory (Control of Judging). 1:45 PM 0:15 Networking Break Architecture Auditory (Control of Judging). 1:40 Introduction to Accumulator Thermal Management and Modeling This lecture will cover the basic concepts and strategies of accumulator thermal management and walk through the development of a thermal model. 1:40 Racing Brake Systems This session will cover the basic concepts and strategies of accumulator thermal management and walk through the development of a thermal model. 3:400 PM 1:40 Racing Brake Systems This session will cover the system needs, component sizing, disc design, tuning, related vehicle dynamics, and other subjects. Depth will range from the basics to performance enhancing fine details that are often missed. 3:400 PM 1:50 Networking Break Architecture Auditors This presentation will focus on the principles of designing a suspansion system and its relationship to tires and vehicle performance. 3:400 PM 1:50 Networking Break Architecture Structural Equivalency Spreadtheet (SES) document, covering both tube & composite structures as well as GES of Proportations. We all also highlight common mistakes, and ofter advice for students on how to best leverage this document to meet their safety and performance goals. The Frame & SES Timbs include the Composition Structural Equivalency Spreadtheet (SES) document, covering both tube & composite structures as well as GES of Proportations. We all also highlight common mistakes, and ofter advice for students on how to best leverage this document to meet their safety and performance goals. The Frame & SES Timbs included and some useful first principle acculations. The presentation will be the Composition Structural Equivalency Spreadtheet (SES) document, covering both tube & composite structures as well as the pr	e Gallery (A210)
introduction to Accumulator Thermal Management and Modeling This lecture will cover the basic concepts and strategies of accumulator thermal management and walk through the development of a thermal model. 1:00 Racing Brake Systems This session will cover the system needs, component sizing, disc design, tuning, related vehicle dynamics, and other subjects. Depth will range from the basics to performance enhancing fine details that are often missed. Suspension Design This presentation will focus on the principles of designing a suspension system and its relationship to tires and vehicle performance. Darrell Hancock/Tim Drotar, Stellantis Lear Audit: The Frame & SES In this fecture, we will review the latest Structural Equivalency Spreadsheet (SES) document, covering both tube & composite structures as well as to & EV powertrains. We will also highlight common mistakes, and offer advice for students on how to best leverage this document to meet their safety and performance goals. The Testing and Modeling for Vehicle Dynamics Pee got access to the Tire Test Consortium (TTC) tire database. Now what do I do with It? This presentation will give an introduction to the Paceipla Tim Drotar, Stellantis Lear Audit: 4:15 PM 0:30 Networking Break Architecture 4:45 PM 0:30 Networking Break Architecture Audits Architecture Als pen Resources for Formula SAE Teams This presentation will briefly cover FSAE Tessures from trusted sources to support the design, manufacture, and development of FSAE cars as Melhael Royce, Albion Associates Architecture Audits Archite	Auditorium (A200)
This lecture will cover the basic concepts and strategies of accumulator thermal management and walk through the development of a thermal model. Racing Brake Systems This session will cover the system needs, component sizing, disc design, tuning, related vehicle dynamics, and other subjects. Depth will range from the basics to performance enhancing fine details that are often missed. Suspension Design This presentation will focus on the principles of designing a suspension system and its relationship to tires and vehicle performance. Darrell Hancock/Tim Drotar, Stellantis Lear Audit The Frame & SES In this lecture, we will review the latest Structural Equivalency Spreadsheet (SES) document, covering both tube & composite structures as well. as IC & EV powertrains. We will also highlight common mistakes, and offer advice for students on how to best leverage this document to meet their safety and performance goals. Tire Testing and Modeling for Vehicle Dynamics Pve got access to the Tire Test Consortium (TTC) tire database. Now what do I do with it? This presentation will give an introduction to the Pacejka tire model and some useful first principla calculations. Architecture Audit 4:15 PM 0:20 Networking Break Open Resources for Formula SAE Teams This presentation will briefly cower FSAE resources from trusted sources to support the design, manufacture, and development of FSAE cars as well as how to succeed at competition.
