

Cheryl Stark

Senior Vice President of North America Technical Safety and Regulatory Compliance & Global Technical Compliance Officer
Stellantis

Cheryl Stark is the Senior Vice President of North America Technical Safety and Regulatory Compliance at Stellantis, where she also serves as the Global Technical Compliance Officer. In this role, she leads the regulatory development of future safety and environmental regulations, oversees certification and compliance activities essential for commercial sales, and manages investigations of potential regulatory non-conformance and recall campaign execution.

With over 35 years of experience across three major automotive original equipment manufacturers (OEMs), Cheryl has built a distinguished career in propulsion systems engineering and technical compliance. Her expertise spans regulatory strategy, risk mitigation, and ensuring product safety and environmental compliance on a global scale.

She holds a Bachelor of Science in Electrical Engineering from Kettering University, a Master of Science in Electronics and Computer Control Systems from Wayne State University, and an Executive MBA from Michigan State University.

Outside of work, Cheryl enjoys culinary arts and outdoor activities, embracing creativity and adventure beyond the automotive world.
